

TARGET FOR PHOTOGRAMMETRIC
ANALYTICAL MEASUREMENT SYSTEM

ABSTRACT OF THE DISCLOSURE

5 A target, which is photographed with an object at a
spot for a photogrammetric analytical measurement, includes
a first bar and a second bar that are connected to each
other; at least three standard point members, lying on one
plane, and fixed on the first bar and the second bar; and
10 non-reflecting members that are respectively attachable to
and removable from said at least three standard points. The
at least three standard point members may respectively
include a circular portion, a diameter of which substantially
equals a width of the first bar and the second bar. Each of
15 the non-reflecting members includes a circular plate defining
a circular opening, a diameter of which substantially equals
the diameter of the circular portion of the three standard
point members.
